

EV-RNAome

All RNA Classes. One Assay.

Our TrueQuant (TQ) pan-RNA-seq Kit and Service captures mRNA, lncRNA, and small RNA of extracellular vesicles or cell-free RNA simultaneously in a single assay, saving time, resources, and precious sample material.

Method & Features

- TQ pan-RNA-Seq
- Simultaneously analyses of all RNA classes
- Ultra low sample Input: 10 pg total RNA
- GXP BioInfonomics Suite for deeper insights

Comprehensive RNAome analyses are achieved by our TQ pan-RNA-Seq assay, which combines highly sensitive adapter integration methods and unique molecular identifiers (UMIs).

Backed by our powerful BioInfonomics Suite pipelines, our assay simultaneously measures:

- miRNA
- tRF
- piRNA
- snoRNA
- tRNA
- lncRNA
- mRNA
- circRNA
- etc.

Deeper Insights into RNA Biology

Contact Us Today

- **Schedule a Technical Consultation:**

Speak directly with our NGS and dPCR experts to tailor a screening pipeline for your specific cellular models.

- **Request a Custom Quote:**

Send us your project requirements and receive a detailed, scalable analytical framework.
